COMPUTER SCIENCE AND TECHNOLOGY OCCUPATIONS

At the Department of Veterans Affairs (VA), top-notch technology professionals are advancing the health and well-being of Veterans and their families. Information security experts protect Veterans' personal data, equip medical centers with computer hardware, deploy mobile apps to track and assist homeless Veterans, and do much more. In these and other ways, VA's technology specialists provide critical contributions to our work on behalf of the nation's Veterans and their families.

DEVELOP THE TECHNOLOGICAL SOLUTIONS THAT SERVE VETERANS. START YOUR CAREER AT VA.

- **A job where you can showcase your skills.** A VA career in information technology combines the stability of government employment with work in emerging fields such as cybersecurity, risk management, and enterprise architecture. VA is a pioneer in the Federal sector in the use of mobile technology, open source, and cloud computing platforms.

- **A career that positions you for success.** With new hire orientation, peer networking opportunities, and instructional support, information technology employees are fully engaged in VA's mission on behalf of Veterans.
- **An employer committed to your career development and advancement.** The education of VA's information technology professionals doesn't end with college graduation; career development, advanced training, and certification are top priorities. VA's competency-based personnel management model ensures that technology professionals follow a defined career path, enrich their skills, and stay on the cutting edge of their field.
- **Work for the opportunity to give back to Veterans.** Start your career at VA and join more than 8,000 technology professionals who are dedicated to providing medical, financial, and memorial services to the nation's Veterans and their families.

VA'S IT PERSONNEL ARE PROTECTING VETERANS' PERSONAL INFORMATION IN THE FOLLOWING WAYS:

Superior Management – Establishing, examining, and upgrading information security policies and directives

Advanced Technology – Upgrading software and equipment to prevent unauthorized access to sensitive data

Enhanced Operations – Establishing and enhancing training programs to educate employees about their information security responsibilities

APPLY TODAY FOR THE CAREER YOU WANT—AND THE FUTURE YOU DESERVE.

Visit www.mycareeratva.va.gov/students to learn more about starting your career at VA. Then go to USAJobs (www.usajobs.gov) to search all VA employment opportunities. While there, set up an online account, submit your job application, and check the status of your application. You'll find hints and FAQs to guide you through the process.
